Summer Heat

As the heat of summer rises, so do the calls of help. Along with numerous consulting calls from county officials we have been kept busy by owners in need of assistance or concerned about their horse's well-being. Because equine can suffer major health issues when the temperatures go up, we stress how important cool, palatable water is. Besides, would you want to drink dirty, hot water when it is 90+ degrees outside? Keeping their water changed or topped off numerous times throughout the day will encourage them to drink more. They will "Thank You" for it!

2018 Review

Along with filtering calls for help and doing consultations we have been focused on two educational projects. Each offering important material to help not only law enforcement and owners of equine but animal owners in general. We feel education is one of the first steps to help stop the suffering and we are dedicated to getting that first and foremost.

Because of your generous support we were able to fulfill one of our Wish List items. We now have enough corral panels to make a 40' holding corral or 4 temporary stalls! We want to thank all those who have shown their support through donations or gifts in kind. If you're interested with helping us fulfill other items on our list, please check out our wish list at www.heartsofhorsehaven.org
